## Guess My Secret Number!

This game can be played with any number of players and in any location – even a car.

Decide who is going first. That person thinks of a number between 1 and 100.

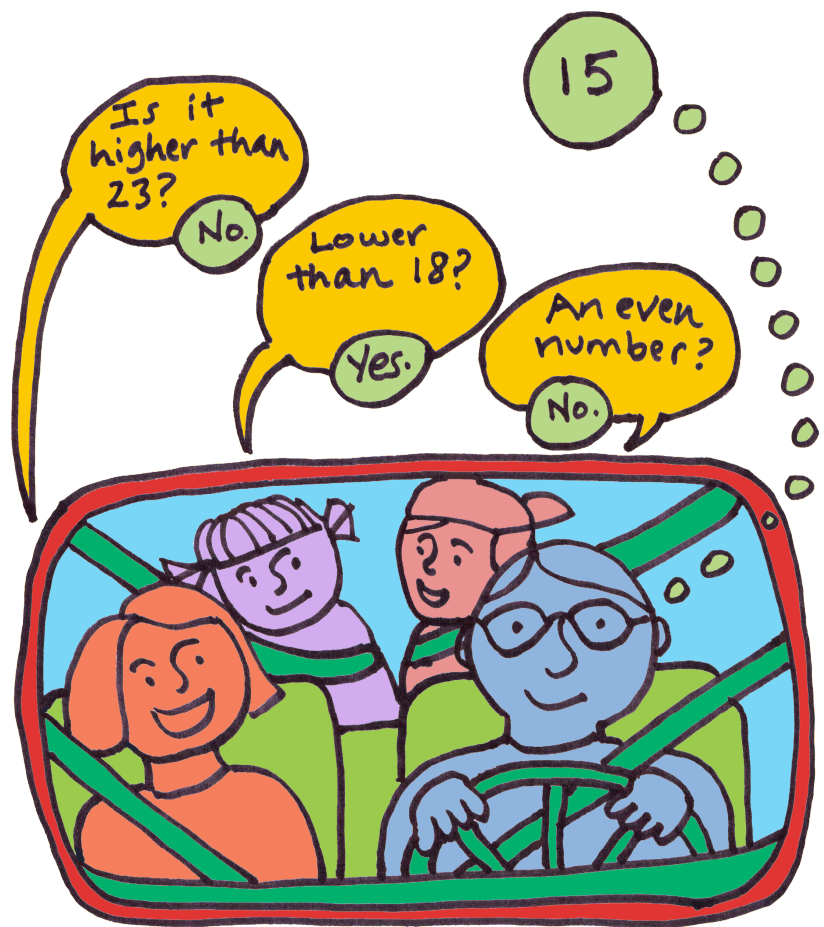

Going clockwise, each player gets to ask one question that can be answered by “yes” or “no” to try to determine the secret number.

The number person responds.

A player is designated to keep track of the questions. The number person gets 1 point for each question and 2 points for each incorrect guess. The player who guesses correctly gets 2 points and starts the next round.

When you stop, the person with the most points wins!

Have fun!
